

# REDUCE THE RISK

**Firefighters are 2x more likely to develop certain cancers**

**RESPONDER WIPES®** are developed by a firefighter for firefighters. They are uniquely formulated with Micellar Water, an innovative ingredient with cleansing compounds that dissolve dirt, oil, soot, and other hydrocarbons. Micelles gently lift away toxins and contaminants, and draw out impurities from pores while hydrating your skin more effectively than traditional cleansing wipes.

**ORDER ONLINE >>> [DQEREADY.COM/RESPONDERWIPES](https://dqeready.com/ResponderWipes)**

### EXTRA LARGE WIPE

- » 16 X-Large Wipes individually packaged
- » Each wipe is 12" x 24"

## RESPONDER WIPES®

There are several things that make Responder Wipes different from any other wipe developed for firefighters.

**Multiple Sizes** - The XL version of Responder Wipes measure an impressive 12" x 24" and the Medium version is 8" x 12" - truly "full body wipes" that provide ample opportunity to clean up. The Small version is 8" x 8" and conveniently comes in a multi-pack.

**Individually Wrapped** - The XL and Medium sized Responder Wipes are individually packaged, ensuring they won't dry out. Keep them in your gear bag, on the engine, or even one in your turnout coat or pants pocket - they'll be there when you need them.

**Aloe and Alcohol Free** - Why is this important? Both of these ingredients are penetration enhancers - they open your pores. You should remove as many contaminants as possible without absorbing more through open pores, so Responder Wipes are aloe and alcohol free.

**Safe for Sensitive Skin** - The fireground is hazardous enough, you don't want wipes that will irritate your skin. Responder Wipes' unique formula encapsulates soot, dirt, sweat, odor, and grime, gently removing it from your skin while leaving it feeling nourished and hydrated.

**Multi-Functional** - Responder Wipes are safe for all areas of your body - face, hands, bottoms, and everywhere in between. They are even safe to use on Motorola APX7000 radios!

**Thick and Durable** - Responder Wipes are thick, strong, and durable enough to tackle a 5 o'clock shadow without ripping or tearing. Perfect for structural or wildland firefighters, they are the thickest fire-specific wipe on the market.

**Fresh Scent** - The light fragrance of Responder Wipes is fresh and clean. They leave you feeling invigorated without a heavy scent.

**Extra Wet** - If you've ever tried a wipe lacking in moisture, you know how ineffective it can be at cleaning up contaminants. Responder Wipes contain enough solution to ensure a full body cleansing with moisture to spare.

**Cooling Effect** - There's no air conditioning on fire ground, but Responder Wipes provide a cooling sensation to the skin that feels refreshing and soothing. Try draping the XL Wipe over your neck as a cool towel. They're even more effective when kept on ice.

**No Sticky or Sudsy Residue** - Have you ever felt like you needed to rinse off after using a wipe with a sticky or sudsy residue? The idea is to cleanse the skin, not make matters worse. Responder Wipes leave the skin with a fresh, "just out of the shower" clean feeling.

**Biodegradable** - Responder Wipes are made of 100% Viscose - natural, sustainable, and biodegradable fibers that minimize their impact on the environment. They degrade in as little as 28 days.
